DETAILED ACTION

Status

This action is in response filed April 6, 2010. Claims 1-6, 10-15, 17, 18, 20, 21, 23, 24, 26, 28-31, 33-35, 37-44, 46-52, 58, 59 are currently pending. Claims 1-4, 6, 10, 12-15, 17, 18, 20, 23, 24, 26, 28-31, 33-35, 37-39, 41-44, 46-52, 58 and 59 are amended. Claims 60 and 61 are cancelled. No claims have been added.

Allowable Subject Matter

1. Claims 1-6, 10-15, 17, 18, 20, 21, 23, 24, 26, 28-31, 33-35, 37-44, 46-52, 58, 59 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art to the claimed invention is Willard (US 20050192892 A1) in view of Narin (US 6966034 B2) in further view of Epstein (US 20030004828 A1) in further view of Courts et al. (US 6480894) in view Guenther et al. (US 6134588 A).
3. In regards to the independent claims 1, 17, 33, and 58 the closet prior art to the current application. Willard teaches an ACH network transactions for debit cards. Narin teaches Internet payment enablement and support for merchants, as well as for banks, acquirers and other financial institutions. Epstein teaches network communications and database maintenance and in particular to a system to facilitate Internet commerce. Courts teaches maintaining states for user sessions with a web system. Guenther

teaches a method for ensuring that a Web browser obtains high availability to Web services. Because the invention is complex, some details are taught by the combination of Willard, Narin, Epstein, Courts et al., and Guenthner et al. the combination fails to teach or suggest all the limitations of the current invention. Specifically the combination of the prior art does not specifically teach receiving a first financial transaction authorization request which has a supplemental header containing a contract identification field which stores an identification of a contract between the merchant and a payment provider, a gateway processor for processing the financial transaction request and when the contract identification field does not match sending a second financial transaction authorization request which is specifically generated by the gateway processor which has data indicative of information contained in the first financial transaction authorization request and receiving a response to the second financial authorization request combined with a cache-key filed which is utilized by the gateway processor as a basis for selecting a sub-set of merchant invariant data, a second financial transaction request designated directly or indirectly in a first financial transaction authorization request generated by a gateway processor with data indicative of a first transaction authorization request as recited in claims 1, 17, 33, and 58. These claims are found allowable because the claims are non-obvious over the prior art of record, either alone or in combination.

4. The dependent claims 2-6, 10-15, 18, 20, 21, 23, 24, 26, 28-31, 34-35, 37-44, 46-52, and 59 as being further limiting to the independent claims, definite and fully enabled by the specification are also allowable.

5. It appears that the instant invention is beyond the skill of one of ordinary skill in the art. Accordingly the invention would NOT have been obvious because one of ordinary skill could not have been expected to achieve it, NOR would they have been able to predict the results, and as such, they would have had no capability of expecting success.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
